KPA Supreme Command Issues Communique

Pyongyang, November 23 (KCNA) -- The Supreme Command of the Korean People's Army Tuesday released the following communique:

The south Korean puppet group perpetrated such reckless military provocation as firing dozens of shells inside the territorial waters of the DPRK side around Yonphyong Islet in the West Sea of Korea from 13:00 on Nov. 23 despite the repeated warnings of the DPRK while staging the war maneuvers for a war of aggression on it codenamed Hoguk, escalating the tension on the Korean Peninsula.

The above-said military provocation is part of its sinister attempt to defend the brigandish "northern limit line," while frequently infiltrating its naval warships into the territorial waters of the DPRK side under the pretext of "intercepting fishing boats."

The revolutionary armed forces of the DPRK standing guard over the inviolable territorial waters of the country took such decisive military step as reacting to the military provocation of the puppet group with a prompt powerful physical strike.

It is a traditional mode of counter-action of the army of the DPRK to counter the firing of the provocateurs with merciless strikes.

Should the south Korean puppet group dare intrude into the territorial waters of the DPRK even 0.001 mm, the revolutionary armed forces of the DPRK will unhesitatingly continue taking merciless military counter-actions against it.

It should bear in mind the solemn warning of the revolutionary armed forces of the DPRK that they do not make an empty talk.

There is in the West Sea of Korea only the maritime military demarcation line set by the DPRK.
