## **US Should Apologize for Its Anti-DPRK Conspiratorial Document: KCNA**

Pyongyang, January 29

The "report of the Inquiry Commission" on the human rights performance in the DPRK, which served as a basis of the anti-DPRK "human rights resolution" rammed through the plenary meeting of the 69th UN General Assembly in December last year by the hostile forces, is now being ridiculed and censured by the international community.

Sin Tong Hyok, who had come out as a primary "testifier" when cooking up the "report", confessed that he had made false "testimonies." This brought to light once again the absurdity and reactionary nature of the U.S.-led anti-DPRK "human rights" racket.

Leading media of the Western countries including the U.S., the U.K., France and Germany, commenting on Sin's confession, claimed that they doubt the credibility of the "report of the Inquiry Commission" and the "human rights resolution" based on it and they cannot believe the remarks of the "defectors from the north" who were forced by backstage forces to tell lies. They also asserted that the U.S., which tried to refer the "human rights issue of north Korea" to the International Criminal Court, is finding itself in a very awkward position due to Sin's confession.

The U.S. which had been desperate in its anti-DPRK "human rights" campaign by taking "defectors from the north" to the UN and other international arenas sustained bitter shame before the international community. "Defectors from the north" reportedly hesitate to join in the "human rights" conspiratorial farce.

This is a natural outcome of the base and impudent act of the U.S. which attempted to mock at the conscience of the world public by internationalizing and hyping the non-existence "human rights issue" of someone. It also clearly proves that the UN "human rights resolution" is no more than a product of conspiracy as it does not deserve even a passing note.

This notwithstanding, Washington and its followers, far from making an apology for their wrongdoings the truth behind which has been disclosed, are behaving in a base and vicious manner in a bid to justify their bankrupt anti-DPRK "human rights" resolution, crying out for continued international pressure upon the DPRK and the like.

This is no more than ridiculous piffle of the brazen-faced ones.

The former chairman and the special rapporteur of the "Inquiry Commission" who impudently behaved as servants of the U.S. are busy touring here and there, making clumsy

excuses and asserting the "report" based on the testimonies made by "defectors from the north" and the "resolution" still remain valid.

This is nothing but the last-ditch effort to make their farce strongly censured by the international community sound plausible and internationalize the "human rights issue" of the DPRK at any cost.

As already disclosed, those who cooked up the "report" are all bribed political swindlers and despicable human scum.

Christopher Black, member of the Law Society of the Canadian Senate and an international criminal lawyer, in his article titled "North Korea, UN, Declaration of War" claimed that one cannot but be shocked at the fact that Kirby, Biserko and Darusman, the three members of the Inquiry Commission, all had been involved in operations sponsored by the organizations working for the CIA.

As far as the former chairman of the "Inquiry Commission" Kirby is concerned, he is an old sexual maniac who earned an ill-fame for his decades-long homosexuality. He, under the mask of "lawyer", even cried out for legitimacy of homosexual marriage censured even by people of his country and has been keen on perpetrating only politically-motivated frauds and swindle. He is also a heinous anti-DPRK confrontation element with an inveterate bad habit of interpreting its system in a Nazi manner.

Darusman is an opportunist who became a member of the Golkar party in Indonesia which earned an ill-fame by murdering with the CIA help 500 000 communists and people linked to leftist and labour circles in 1965. He is also an adviser to the United States Indonesia Society, a U.S. government front group and a member of the Global Leadership Foundation whose patrons include such unsavory characters as George W. Bush and Lech Walesa.

As seen above, the three members are all the worst betes noires rare to be found in the world who bartered away their dignity as human beings for the money paid by the U.S.

The confession of the "defector from the north" again clearly proved that all the remarks made by "defectors" in ambiguous manner are unbelievable and the "report of the Inquiry Commission" is no more than a conspiratorial document. So, it is needless to say that all the anti-DPRK "human rights resolutions" railroaded on the basis of them are invalid.

The U.S.-led hostile forces should make an apology for cooking up the anti-DPRK "resolution" based on lies told by Sin and other betes noires and retract it at once.
